### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:
  - a. In light of applicants' detailed arguments in the Appeal Brief filed May 13, 2008, and further consideration, claims 26-65 are allowed. Of particular relevance, applicants' arguments with regard to independent claim 26 assert that the prior art fails to anticipate at least a portion of the wall separating the combustion box from the oven cavity not being insulated. While other prior art references may be found lacking insulation, their combination with Gilliom would not be proper since Gilliom clearly teaches away from such a combination by providing a thick layer of insulation over the entire wall (see at least fig. 2). Also of particular relevance, applicants' arguments with regard to independent claim 33 assert that the prior art fails to anticipate the openings being formed in the oven bottom wall such that the oven cavity and the combustion box are in direct fluid communication. While other prior art references may be found a bottom wall with openings as recited in the claims, their combination with Gilliom would not be proper since Gilliom clearly teaches away from such a combination by isolating the two chambers with a thick layer of insulation (see at least fig. 2). Naturally the allowability of any single limitation in and of itself is not at issue. Nevertheless, in combination with the remainder of the elements recited in the claim, the claimed subject matter is allowable. The prior art of record does not

anticipate, nor make obvious, the claimed invention, alone or in combination therewith.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
